IN THE CLAIMS:

The following is a complete listing of the claims, and replaces all earlier
version and listings.

1. (currently amended): An image input apparatus which is capable
of directly transmitting a digital image to an image output apparatus, comprising:

an obtaining ~~means for obtaining~~ unit configured to obtain, from the image
output apparatus, capability information including information related to an image
outputting function of the image output apparatus;

a user interface ~~selecting means for selecting~~ selector that selects, based on
the capability information obtained by said obtaining ~~means~~ unit, a user interface for
controlling the image output apparatus; and

a display ~~means for displaying~~ unit configured to display the user interface
selected by said [[use]] user interface ~~selecting means~~ selector.

2. (currently amended): The image input apparatus according to
claim 1, wherein said user interface ~~selecting means select~~ selector selects a user interface
in which an item related to a function excluded in the image outputting function is
disabled.

3. (currently amended): The image input apparatus according to
claim 1, wherein said user interface ~~selecting means select~~ selector selects a user interface

that does not include an item related to a function excluded in the image outputting function.

4.   (currently amended):   The image input apparatus according to claim 1, wherein if said user interface ~~selecting means have~~ selector has determined, based on the capability information, that the image output apparatus does not have a trimming image output function, said user interface ~~selecting means select~~ selector selects a user interface in which an item related to the trimming image output function is disabled.

5.   (currently amended):   The image input apparatus according to claim 1, wherein if said user interface ~~selecting means have~~ selector has determined, based on the capability information, that the image output apparatus does not have a trimming image output function, said user interface ~~selecting means select~~ selector selects a user interface that does not include an item related to the trimming image output function.

6. (previously presented): The image input apparatus according to claim 1, wherein said image input apparatus is a digital camera and the image output apparatus is a printer.
